(54) Title: **EDIBLE PRODUCT COMPRISING STARCH-CONTAINING MATERIAL AND PROCESS FOR PREPARING THE SAME**

(57) Abstract: This invention relates to an edible product with homogeneous consistency containing a starchy vegetable material and having a water content of at least 60% by weight. At least 50%, preferably at least 75% of the cells of this vegetable material are broken, and the amylose contained in the starch is dispersed as amylose particles with a size of less than 10 µm within the amylopectin of the starch. The invention also relates to a process for preparing such a product.
